WORK EXPERIENCE

ATLASSIAN | Senior Software Engineer, Backend

Bengaluru, IN | Dec 2024 – Present

- **Reliability:**

- Created a Jira-wide Template for config based generation of dashboards and alarms **adopted by 25+ teams** within the Jira Org with further adoption in progress.
- Introduced the concept of multi-trials and Volume based alerting that takes into consideration weekends and public holidays to prevent noise.

- **Jira Attachments:**

- Architected the backend api for filtering attachments based on types to introduce tabbed-layouts. **Improved Attachment search times by 12%.**
- Designed and implemented the backend api for consolidating static files and first party documents into a single api with support for multiple forms of pagination, sorting and filtering.

MEDIA.NET | Manager - Web Tech

Mumbai, IN | July 2016 – Dec 2024

- **PurePlay - Video Content and Ad Serving:**

- Designed and Developed an ecosystem of services for video content curation using IAB and Sprig categories. Engineered storage and transcoding solutions for different bitrates and streaming formats. Integrated a customized Prebid solution for video ads to increase ad fill rates. Introduced a player solution with a host of features that **increased user-engagement by 18%.**
- Within 4 months, the product contributed to a **2% increase in monthly revenue** of the company.

- **Graph-Engine:**

- Engineered a finite automata system for efficient Ad and Content selection on SERP. Managed API dependencies and compliances using Directed Acyclic Graphs (DAGs) to align with business requirements and **increasing ad fill rate by 14%**
- Achieved a **40% reduction in server response times** and **9% boost in revenue.**

- **Re-Architecture Ad-Serving:**

- Led a team of developers in an architectural overhaul, replacing the traditional CDN caching layer with a scalable backend distributed system across data centers and cloud with improved cache hit rates. **Reduced latency by approximately 200ms** (35% of total response time).
- **Boosted QPS per server by 40%**, thereby **reducing costs by 15%** and **boosted revenue by 3%.**

- **IP to Geo lookup Database:**

- Collaborated and launched a common multi-DC solution across teams by optimizing storage and lookups of IPv4 and IPv6 addresses using Quad Trees, Segment Trees, and sorted sets.
- **Reduced lookup times by nearly 45%** across all traffic.

SKILLS

Languages: Go, JavaScript, NodeJS, PHP, Java, HTML/CSS, SQL

Technology: Git, Akamai, GCP, Redis, Aerospike, Kafka, Kubernetes, Docker, CI/CD, Linux

Miscellaneous: Project Management, System Design, Collaboration, Communication

Domains: Ad-Tech, Video Streaming, Distributed Systems, Chrome Extensions, LLM Applications

SIDE PROJECTS

Debug+ (Internal Tool): Chrome extension for HTTP request analysis and comparison.

Tree-Leveled Cipher: An encryption algorithm based on the concept of binary trees and level-order traversal.

EDUCATION

BACHELOR OF ENGINEERING | Computer Science

Mumbai, IN | Aug 2012 - Jun 2016

Fr. Conceicao Rodrigues College of Engineering
